

Electronic Supporting Information

Synthesis, structural characterisation and bonding in an anionic hexavanadate bearing redox-active ferrocenyl groups at the periphery

Jiří Schulz, Róbert Gyepes, Ivana Císařová and Petr Štěpnička*

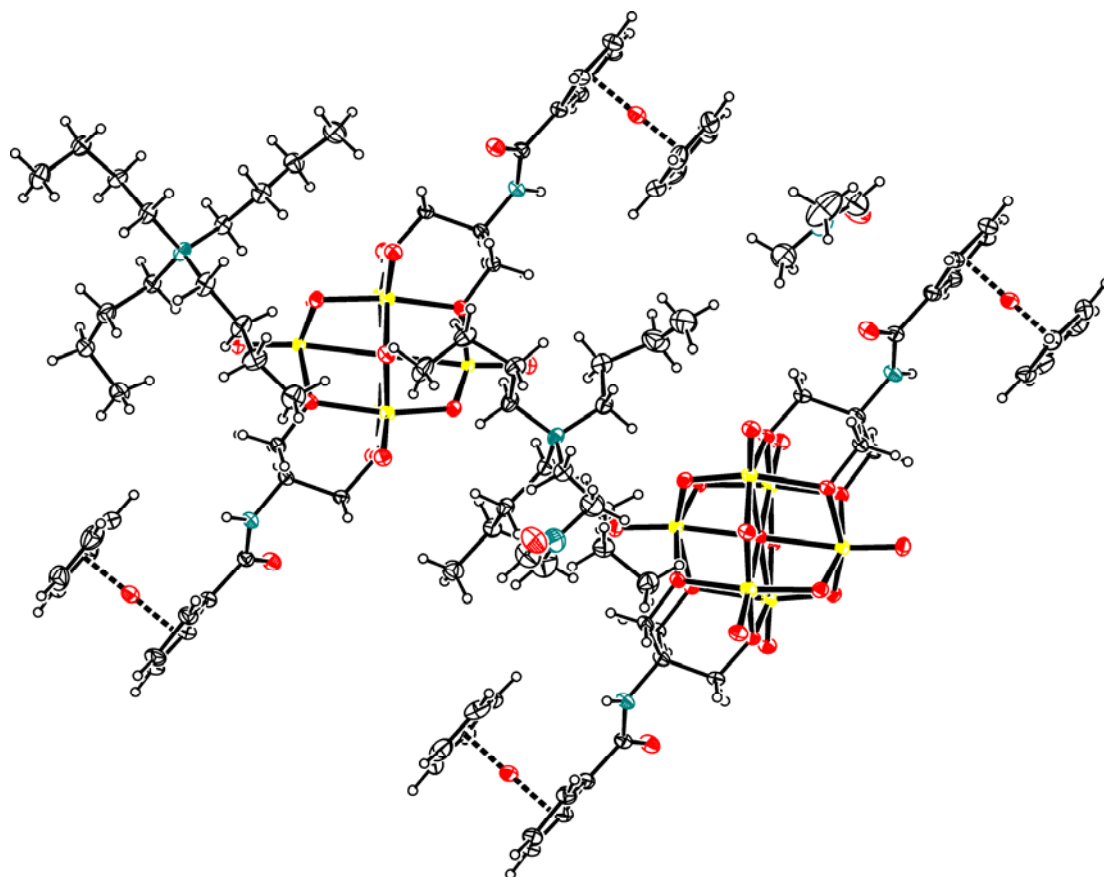

Figure S1. 'Full' PLATON plot of the structure of **2a**.

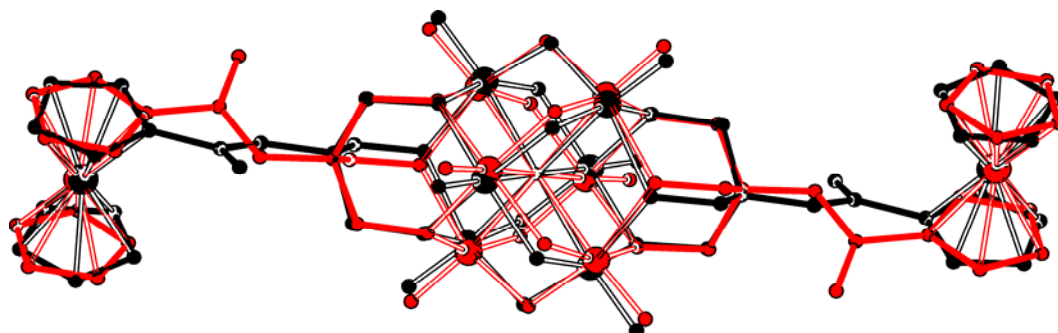

Figure S2. Superposition of the two crystallographically independent anion moieties in the structure of **2a** (molecule 2 in red, molecule 1 in black).
